

The **Cycla Air Pump 2** is a specially engineered heavy-duty bicycle air pump designed for use in indoor and outdoor public spaces.

The Air Pump 2 is designed and fabricated in the USA and will withstand all weather conditions. It is built from tough, Schedule 40 steel, and is serviceable down to the plunger and gaskets. It also features the universal pump head with Presta and Schrader valve compatibility. The pump hose is made of steel-reinforced hydraulic hose for added durability, and replacement pump heads and gaskets are available.

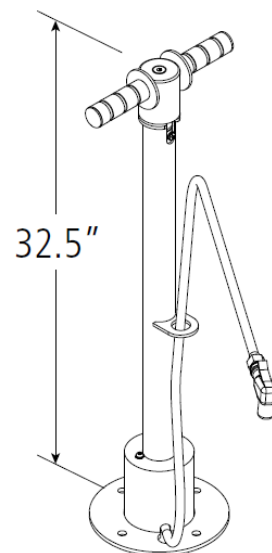

Air pumps may require occasional maintenance and replacing of parts to remain in operation over many years and CIVIQ staff are able to assist with this service.

Product features

- Max Pressure: 160 PSI / 11 bar
- Suitable for outdoor use
- Durable safe anti-slip rubber hand grips
- Universal pump head accepts Schrader and Presta valves
- Steel reinforced air hose
- Gasket rating -34° to 43° C
- Solid pump rod and long life piston seal
- Designed and made in the USA. Patent US9,765,766 B2

Technical Details

Fixing	Bolt-down base plate
Materials and construction	Galvanised steel
	Aluminium cylinder
	Stainless steel fasteners
Finish	Galvanised steel, Black powder coated (standard)
Dimensions	Height: 850mm
	Width: 300mm
	Depth: 200mm
Construction	50mm diameter pipe
	200mm diameter x 6mm base plate

Surface Mount
