Replacement filters for Aquafil and Elkay drinking water stations

Issued: October 2020

PUSH

The importance of replacing filters regularly

Replacing water filter cartridges regularly is best practice and highly recommended. Routine maintenance ensures that filtered drinking stations continue to work efficiently at removing contaminants from drinking water.

Our range of filtered drinking water stations are designed to help create and maintain healthier, happier communities. The filters reduce lead, particles, and chlorine from the water being dispensed from the unit. They also reduce odours and discoloration from water.
